EDUCATION

Lakshmi Narain College of Technology Excellence (LNCTE)
Computer Science Bachelors
CGPA: 8

Bhopal, Madhya Pradesh
November 2022 - 2026

EXPERIENCE

LegalEyePartners | Internship Full-Stack Web Developer

August 2024 - October 2024

- Built a cloud-based website for a legal consulting firm using the MERN stack (MongoDB, Express, React, Node.js).
- Integrated Auth0 third-party authentication for secure authentication and authorization.
- Developed and deployed a custom CMS using Multer (image uploads), Cloudinary (image storage), and Firebase (PDF management).
- Deployed the application on Render with a custom domain via Hostinger.

SKILLS

Programming Languages: Java, Nodejs , JavaScript, TypeScript
Libraries / Frameworks: Express, React, LangChain, LangGraph
Tools / Platforms: Git, GitHub, Postman, Docker, CI/CD
Databases: MySQL, MongoDB, Redis, PostgreSQL, NoSQL

PROJECTS

Anydrop – Cross-Device Clipboard & Snippet Sharing Platform
Tailwind CSS, REST APIs

Next.js, React, TypeScript,

- Designed and built a cross-device clipboard system enabling seamless sharing of text snippets across multiple devices.
- Developed secure backend APIs using Next.js App Router for creating, retrieving, and managing shared snippets.
- Implemented a responsive and intuitive UI with React and Tailwind CSS for fast and frictionless user interaction.
- Addressed type safety, API validation, and error handling to ensure reliable data flow and scalable architecture.

URL-Shortner API

Nodejs, TypeScript , Express, PostgreSQL, Redis

- Implemented **Redis caching** with a **fire-and-forget** sync strategy to PostgreSQL, enabling low-latency redirects without blocking requests.
- Designed a **collision-free Base62 URL generation** system using PostgreSQL **SERIAL** sequences to ensure unique short links at scale.
- Containerized the application with **Docker** and set up **GitHub Actions CI/CD** to run **Jest integration tests** before deployment on **Render**.

Prism - A RAG Evaluator

Next.js, TypeScript, RAG, LLMs, Vector Database, OpenAI APIs

- Built **PRISM**, a RAG evaluation suite to benchmark retrieval quality, answer relevance, faithfulness, and end-to-end performance.
- Designed **structure-aware chunking** with metadata extraction to preserve document hierarchy and contextual relationships.
- Implemented **hybrid retrieval** using BM25 and dense vector search, combining results with **Reciprocal Rank Fusion (RRF)**.
- Developed reproducible benchmarks to diagnose **retrieval failures, context loss, and hallucinations** across RAG pipelines.
